I am a motivated and diligent software engineer with over 6 years of experience in object-oriented programming, focusing on the development, maintenance, and testing of applications using C#, .NET framework, and .NET Core. I am seeking a challenging career that allows me to apply my technical skills and expand my knowledge.

EXPERIENCE

Senior Software Developer

IBASE Myanmar (Singapore based company)
Jan 2022 - Present

Qomunity is a comprehensive digital solution consisting of a website for admin staff and a mobile app for residents. It enhances transparency in estate management by allowing residents and tenants to access essential information and manage buildings digitally. We use C#, .NET framework and .NET Core. I specialize in handling backend API processes. The current project (My Tenant World - MTW) includes the following implementations and bug fixes that are currently utilized in condominiums:

- Facility booking system for common rooms
- Feedback and suggestion submissions
- Announcement management
- Social interactions such as posts, comments and reactions
- Guests and delivery invitation system
- Security fee and other charge calculations

Software Developer

ACTY System Myanmar (Japanese based company)
Nov 2017 - Mar 2021

Develop C# Window Forms and Web Form applications using .NET framework & .NET Core. Create Class & Use Case diagrams, design checklists and conduct testing with detailed procedures. Key implementations include:

- JSON validation tool to compare json files
- Import and export template with Csv & Zip format
- Change the setting of Multifunction Printers remotely
